

Ayuda Ideas Semilla AECC 2024

Adjudicatarios

Dr. Ernesto Mejías

Universidad de Córdoba (UCO)

Improving safety in VACV-based oncolytic virotherapy: built-in fail-proof molecular lock for viral replication

Dra. Sara Blanco

Fundación para la Investigación del cáncer de la Universidad de Salamanca (FICUS)

Targeting RNA methylases in Cancer Therapy: A Novel Approach to Revolutionize Treatment

Dra. Jenniffer Linares

Hospital del Mar Research Institute

Impact of colorectal tumor microenvironment on cetuximab efficacy

Dr. Mario Aguilar

Instituto de Neurociencias de Alicante (UMH-CSIC)

DOPA-CARE Project: Leveraging the dopamine brain reward system to boost the anticancer immune response and promote resilience

Dr. Francisco Galindo

Universidad Jaime I (UJI)

Development of fluorescent markers for early diagnosis of cancers associated with high oxidative stress

Dra. Laia Josa

Instituto de Química Avanzada de Cataluña (IQAC-CSIC)

Light-responsive autophagy inhibitors to eliminate cancer stem cells with high precision

Dr. Jaime Font de Mora

Instituto de Investigación Sanitaria La Fe (IISLAFe)

Targeting MYC oncoproteins for inactivation and proteasomal degradation with benzamilide-based PROTACs derivatives

Suplentes

Dra. Alba García

Centro de Investigación Biomédica
en red (CIBER)

NanoCellCom: Developing a novel
immunotherapeutic nanoplateform for
enabling cancer-immune cell
communication

Dra. Bárbara Martínez

Centro Nacional Investigaciones
Oncológicas (CNIO)

Metabolic shuttling of epigenetic factors

Dr. Joan Brunet

Instituto de Investigación Biomédica
de Girona (IDIBGI)

Y-RNAs AS NON-INVASIVE
BIOMARKERS FOR EARLY CANCER
DETECTION

Dr. Gabriel Ortega

Centro de Investigación
Cooperativa en Biociencias (CIC
bioGUNE)

NanoLIT, a new imaging tool to improve
monitoring of anti-tumor immunotherapy
